

## REMARKS

Claims 1-7 were pending when last examined and stand rejected. Claims 1, 2, 5, and 7 are amended through this response. Claims 3 and 4 are canceled and Claims 8-16 are added. Applicants respectfully request reconsideration and allowance of Claims 1-2, and 5-16.

### **Claim Rejections – 35 USC §102**

Claims 1 to 7 are rejected under 35 USC 102(b) as being anticipated by Park et al. (KR 10-2001-0050708A).

**For Claims 1, 2, 5, and 7:** Claims 1, 2, 5, and 7 are patentable over Park et al. because Park fails to disclose “a plurality of color filters disposed between the data wire/third signal line and the passivation layer.” The Examiner states that Park et al. discloses data wire 62, 64, and 65 and passivation layer 72. However, Park et al. does not disclose “a plurality of color filters” between the passivation layer and the data wire.” (See for example, Fig. 8). Therefore, Park does not disclose all features recited in Claims 1, 2, 5, and 7 as amended. Applicants respectfully request the rejection to Claims 1, 2, 5, and 7 be withdrawn.

**For Claim 6:** Claim 6 depends from Claim 5 and is allowable at least for the reason of dependency on Claim 5. Applicants respectfully request the rejection to Claim 6 be withdrawn.

### **New Claims**

New Claims 8-16 are fully supported by the original disclosure (See for example Fig. 8 and the corresponding written disclosure) therefore, no new matter is added.
